

VitoBestCertifications

Bureau Veritas Certification.

Certification represents assurance by an independent accredited body of conformity to specific requirements. It covers products and their components, services, people and systems.

Certification can improve reputation, open up new markets or simply enable the company to operate. It also enables companies to manage risk and drive performance, by tracking a number of key variables over a period of time.

The certification process typically includes on-site audits and standardized testing and inspections. Once a certificate has been delivered, it is maintained through regular audits.

Good Manufacturing Practice.

The **Good Manufacturing Practice (GMP) certificate** issued by HSA (Health saving account) is a **certificate** relating to the **manufacture** of a therapeutic product, medicinal product, an active pharmaceutical ingredient or a cosmetic product attesting to its conformity with the relevant **GMP** Standard as appropriate.

Good Manufacturing Practice (GMP) is a system for ensuring that products are consistently produced and controlled according to quality standards. It is designed to minimize the risks involved in any pharmaceutical production that cannot be eliminated through testing the final product.

Hazard Analysis Critical Control Point system. HACCP

HACCP is a management system in which food safety is addressed through the analysis and control of biological, chemical, and physical hazards from raw material production, procurement and handling, to manufacturing, distribution and consumption of the finished product.

CE Certification

CE marking is a **certification** mark that indicates conformity with health, safety, and environmental protection standards for products sold within the European Economic Area (EEA). The **CE marking** is also found on products sold outside the EEA that are manufactured in, or designed to be sold in, the EEA.
